Reports to

Lead Technical Architect

Location

Qormi, Malta

Job Overview

The team at Milkbox Malta is growing and we are looking for a DevOps Engineer who has worked in an agile environment to join us! We are part of a world-leading performance marketing group, developing an all-in-one marketing business application.

Job Description

You will be in charge of the Operational and Technical function which is responsible for deploying, configuring, managing, and operating scalable, secure, highly available, and fault-tolerant systems on AWS.

Who you are

- You are committed and reliable
- You have strong, self-guided problem-solving skills & a self learner
- You are autonomous, resourceful, positive and calm in a production-oriented environment
- You have the ability to work in a fast paced and rapidly changing environment
- Your curiosity and willingness to learn new technologies
- You have the ability to Source control and drive Continuous Integration
- Driven by your entrepreneurial mindset, you have a winning attitude and ability to thrive in chaos to get sh*t done!

What you'll be doing

- Configure and maintain AWS environment for PCI compliance
- Build and manage highly scalable cloud applications (multi-az deployments)
- Document and demonstrate solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments and clear code;

Milkbox Malta - DevOps Engineer

- Work proactively to identify areas of cost inefficiency, develop mitigation plans, and execute on them.
- Set up and maintain monitors on all relevant metrics generated by application systems.
- Work with AWS services such as CloudFormation, CloudFront, Kinesis, SQS, SNS, API Gateway and Lambda as an asset.
- Networking configuration (LAN, VLAN, WAN, Firewalls, iptable, TCP/IP etc.).
- Implement monitoring / Enforcement solutions (Grafana, Consul).

What you have

- Knowledge about testing security vulnerabilities (Cross-site scripting, sql injection etc.)
- Experience with AWS
- Experience in the Payment Card Industry

Considered an asset:

- AWS Certifications: Solutions Architect, Certified Developer, SysOps
- Work experience in an Agile environment
- Work with GIT
- Work with various tools/frameworks such as: Docker, AWS services (EC2, API Gateway, Lambda, Dynamo, etc.)

Our offer to you

- Competitive Salary
- Quarterly performance-based bonuses
- Finish your week at 1 pm on Fridays
- Possibility to travel: Job opportunities in our other international offices
